## BOTHWELL FOUNDATION AWARDS SCHOLARSHIP

The Bothwell Regional Health Center Foundation has awarded its Medical Careers Scholarship to Michael Keirse, Tipton.

Keirse, a 2012 graduate of Tipton High School, has been accepted into the six-year baccalaureate-doctor of medicine program at the University of Missouri-Kansas City. His current plan is to later pursue a residency in surgery.

“We were impressed with Michael’s application and his desire to use his abilities to improve the lives of individuals through medicine,” said David Floyd, president of the Bothwell Regional Health Center Foundation Board of Directors. “Our goal with this scholarship is to help local students obtain health-related degrees in the hope that they will return to this area to provide services.”

Bothwell Regional Health Center Foundation was formed in 2005 in an effort to develop private resources to improve health-care services in the area. It is overseen by a board of directors comprised of community leaders.
