

# Did You KNOW

## Bothwell can get a picture faster than you can say 'cheese.'

The new computerized tomography (CT) scanner at Bothwell Regional Health Center is so fast, it can get crystal-clear pictures of your insides in mere seconds. This powerful, cutting-edge CT technology means less time on the table for patients and more detailed images for physicians to make a diagnosis. All this is done while exposing patients to lower, safer doses of radiation. Even if you won't lay still and say "cheese," our new CT scanner is just another reason you should get to know more about our exceptional care.
