

# Did You **KNOW**?

## **Bothwell is a safer place to have surgery.**

Unfortunately, infection can be a risk in any surgery. However, the risk is lower at Bothwell Regional Health Center, where we boast an infection rate of less than 1 percent. This is much lower than the national average of 2 to 5 percent of patients who develop post-surgical infections. We hold the line on surgical infections by making sure our surgical teams follow stringent safety guidelines for patient care. Our safe surgery is just another reason you should get to know more about our exceptional care.
